

The Rachel Pips Group

*"Trading with purpose. Building and teaching
an avenue of wealth."*

Who We Are: We are a group of active digital investors that believes investors can be successful when prepared and led correctly.

What We Do: We mentor returning investors, aspiring investors and even brand new entry level investors.

Why We Exist: We truly believe investors can be extremely successful when mentored and prepared properly. Many investors enter and exit the Foreign Exchange market quickly due to lack of knowledge or leadership. Anyone can be successful in investing no matter the age, gender or nationality.

START NOW: Our best suggestion is to enroll to ***start learning now. ONLY \$235*** to enroll, **\$175 recurring** afterwards. Refer two paying customers and your membership is **FREE**. You don't need to start investing right away, but if you'd like to, please see our Binary Brokers List with brokers allowing minimum deposits low as \$50 bucks.

What Is Forex Trading?

The **foreign exchange** (also known as FX or Forex) market is a global marketplace for exchanging national currencies against one another.

HFX (*High Frequency Forex*) is predicting if the exchange rate for that currency pair will go up or down.

How Much Is The Forex Market Worth In 2021?

The worldwide 2021 forex market is worth \$2,409,000,000 (\$2.409 quadrillion). \$6.6 trillion on average every day is traded on foreign exchange markets.

What Is Traded?

1. Currency
2. Commodities
3. Cryptocurrency

To start learning and trading, you'll need **\$235** for tuition the first month and \$175 a month after the first month. There's a student referral program when you recruit 2 paying customers, your monthly membership fee is waived as long as they stay active. There's no commitment and you can cancel at any time.

Making **profit with Forex** is about buying a currency pair at a low price and selling it for a higher price.

Making profit with **HFX** is simply predicting if the currency pair you've selected exchange rate will go up or down in the fixed time period.

- **Put options** allow you to bet against the market because instead of taking ownership of an asset, you are speculating on an asset's price movement. (currency is going DOWN in value, more profitable for you.)
- A **call option** is a contract that gives the buyer the right but not the obligation to buy a specific asset at a specific price, on a specific date of expiry. The value of a call option appreciates if the asset's market price increases. (currency is going UP in value, not as much profit.)

The Forex Market Hierarchy

Morgan Stanley, JP Morgan Chase, Deutsche Bank, HSBC (British Multinational Investment bank and financial services), UBS (Swiss Multinational Investment bank and financial services, Royal Bank of Scotland and Goldman Sach just to name a few major players in the Forex Market.
